How you can apply “WITHOUT” surface preparation like sanding-sand blasting with PaintFlex®

Clean up Oil and dust

Apply PaintFlex® Please see
“How to apply PaintFlex®” Doc. (This time we
used Conventional Air Sprey gun.)

Apply Gel Coat
(Option: You can use
Lacquer for car.)

Apply Conventional Car Paint. Substrate colour
will be invisible.
(This time we used “Brown-Gold Base car
Paint ”)

PaintFlex® paint will be Binding permanently on the New & Previously Gel Coated surfaces of FRP-GRP-Glass Fiber Products the followings:

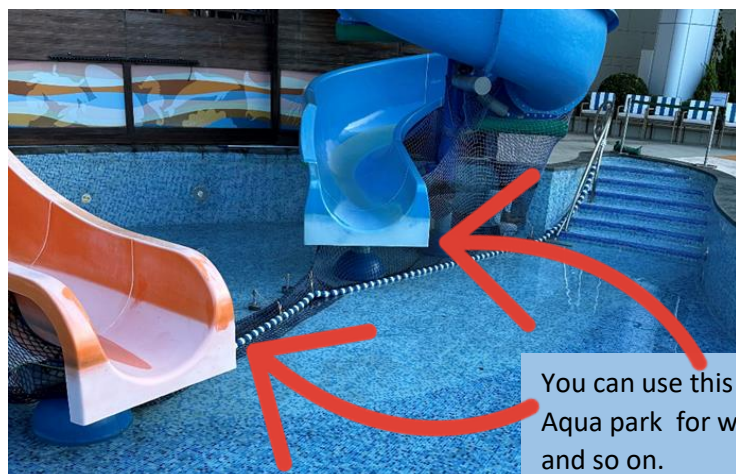

- Conventional Color and Clear Gel Coats
- Conventional Car & Marine 2K Color Paint
- Conventional Car & Marine base colour Paint (Unlimited Colors options) like
 - ✓ Gold and Fancy Colors with Protective Top Clear Gel coat or Lacquer finishing
- Filler /Putty for repairing damages like hole, Scratching and others.
- Conventional Functional Paints like Anti-Fouling, Anti Slip and others

Some other Benefits

- Saving your time and Labor cost
- Clean Environment by Eliminate Sanding-sand blasting, unhealthy dust fibers.
- Fast delivery painting projects
- Unlimited Color Options previously was not easy.
 - ✓ Transferring Conventional Car-Marine paints options like
 - Metallic, Gold and Fancy Colors on the Previously Gel Coated surface
 - ✓ Finishing Top Coat with Conventional Clear Gel Coat or Clear Lacquer.
- Homogenous Color Finishing (Less Discoloration)
- Conventional Car-Marine paint are Color fading resistance.
- It can re-paint and change the Colors unlimited at any time without surface preparations.
- Easy repair Spider cracks and other damages

It is common knowledge previously Gel coated FRP-GRP surface are **non-receptive** to bonding with

- Conventional Color-Clear Gel Coats,
- Car-Marine Paint/Coating and
- other functional Paints like antifouling direct **without heavy& painful sanding-sand blasting.**

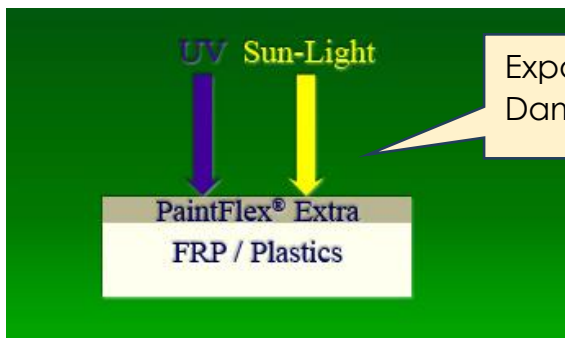

You can use this system at Aqua park for water slider, and so on.
